History of Publications

Term	Vol.	Title	Published
Jan., 1929– Dec., 1947	1–16	化学研究所講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
April, 1933	—	10 Jahre Institut für chemische Forschung (化学研究所創立十周年記念号)	—
March, 1949– Dec., 1949	17–19	化研講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
March, 1950– Sept., 1952	20–30	化学研究報告 (Bulletin of the Institute for Chemical Research)	Quarterly
Dec., 1951	—	The Commemoration Volume for the Silver Jubilee (化学研究所創立二十五周年記念号)	—
Jan., 1953 onwards	31 No. 1–	Bulletin of the Institute for Chemical Research (化学研究所報告)	Bi-monthly
Nov., 1966	44 No. 6	Special Issue on the Commemoration of the Fortieth Anniversary (化学研究所創立四十周年記念号)	—
Nov., 1976	54 No. 6	Special Issue on the Commemoration of the Fiftieth Anniversary (化学研究所創立五十周年記念号)	—

稲垣 博教授

Professor Dr. Hiroshi Inagaki

Emeritus Professor Hiroshi Inagaki

On the 31st of March, 1988, Dr. Hiroshi Inagaki retired after having completed his 41 years service at Kyoto University. On the following day, the University honored him with the title of Emeritus Professor.

Dr. Inagaki was born in Nagoya on the 3rd of December, 1924. He graduated from Kyoto University in 1946 majoring in Fiber Chemistry at the Faculty of Engineering. After 6 years of research and teaching service at the same Faculty as a full-time lecturer, he was promoted to associate professor in 1954 to join the Institute for Chemical Research, Kyoto University. In 1960, he was appointed full professor to take charge of a new laboratory, the Laboratory of Polymer Properties. In accordance with the development of his research work, his laboratory was later renamed the Laboratory of Polymer Separation and Characterization.

He has conducted extensive research in physico-chemical fields of polymer science. Specifically, his research fields have included the separation and characterization of macromolecules, the structure and functionalization of naturally occurring polymers such as wool and cellulose, and the properties and formation mechanisms of copolymers. His pioneering work in each field is known worldwide.

For two years commencing from April of 1984, he served as Director of the Institute and as a member of the University Council. He was Director of the Society of Fiber Science and Technology, Japan, and Conference Chairman of several large international conferences.

He has been much concerned about problems related to academic interchanges and exchanges of students with foreign countries, and made no small contribution in this field. For example, he is a cofounder of "Haus der Begegnung Kyoto" (Kyoto International Student House).

He gave lectures on physical chemistry of macromolecules at the graduate school of engineering at Kyoto University as well as at many other foreign and domestic institutions, and he supervised the dissertation work of a number of graduate students.

His sincere and warm personality is respected by many friends, colleagues, students and all those who came in contact with him. This collection of papers is dedicated to Dr. Inagaki in honor of his long period of service, his great contribution to the Institute, and his retirement.

倉田道夫教授
Professor Dr. Michio Kurata

Emeritus Professor Michio Kurata

On the 31st of March, 1988, Dr. Michio Kurata retired from Kyoto University after 36 years of service to Kyoto University and was honoured with the title of Emeritus Professor of Kyoto University on the following day.

Dr. Kurata was born in Tokyo on the 23rd of February, 1925. He graduated from Department of Applied Chemistry, Tokyo Institute of Technology in 1947. He continued his studies on statistical mechanics in the graduate school at Tokyo Institute of Technology, and afterwards at Department of Industrial Chemistry, Kyoto University, under the supervision of Professor M. Tamura. After the graduation, he was appointed a lecturer of the Faculty of Engineering, Kyoto University in 1952 and was promoted to an associate professor in 1954. He received a doctoral degree from Kyoto University for his studies on statistical thermodynamics of liquid mixtures. In 1959, he made a leave stay at the Massachusetts Institute of Technology, and worked for two years on statistical mechanics of polymer solutions in cooperation with Professor W. H. Stockmayer.

In 1962, Dr. Kurata moved to the Institute for Chemical Research, Kyoto University as a full professor to direct the Laboratory of Polymer Solution. In 1974, he was invited to stay in Sweden as a Nobel Guest Professor of the Royal Academy of Science. In 1987, he reorganized the Laboratory of Polymer Solution and established a new research division: Laboratory of Fundamental Materials Properties. Dr. Kurata conducted extensive research on static as well as dynamic properties of polymeric materials, and played an important role as an active leader in the field of polymer science. In 1987, the Society of Polymer Science, Japan, awarded a prize to him for his great achievement. He gave lectures on advanced polymer physics and on molecular structure at the Graduate School of Engineering at Kyoto University, and supervised dissertation works of graduate students.

From the 1st of April, 1986 to the 31st of March, 1988, Dr. Kurata was appointed Director of the Institute and made a great contribution not only to the Institute but also to the University as a councilor.

The sincere and warm personality of Dr. Kurata has won him the respect of his friends, colleagues, and students. This collection of papers is dedicated to him to honour his long period of service on his retirement.

Professor Dr. Ryozo Kitamaru

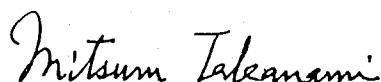

Emeritus Professor Ryozo Kitamaru

On the 31st of March, 1988, Dr. Ryozo Kitamaru retired from Kyoto University after 32 years of service to Kyoto University and was honoured with the title of Emeritus Professor of Kyoto University on the following day.

Dr. Kitamaru was born in Kyoto on the 8th of July, 1924. He graduated from the Faculty of Engineering, Kyoto Imperial University in September, 1947. After two years work at a company he started his studies on fiber chemistry as a graduate student at Department of Fiber Chemistry, Kyoto University under the supervision of Professor W. Tsuji. After the graduation he was appointed a research associate of Institute for Chemical Research, Kyoto University in 1956, and received a doctoral degree from Kyoto University for his studies on chemical treatments of cotton in 1959. He was promoted to an associate professor in 1960. He made two leave stays at the Florida State University from 1962 to 1964 and from 1968 to 1970, and worked as a research associate for totally three years on irradiation cross-linking and crystalline structure of polymers in cooperation with Professor L. Mandelkern.

In 1976 Dr. Kitamaru was promoted to a full professor of Kyoto University to direct the Laboratory of Fiber Chemistry, Institute for Chemical Research, which was reorganized later on to a new research division, Laboratory of Fundamental Materials Properties. Dr. Kitamaru conducted extensive research on modification of natural and synthetic fibers, preparation of synthetic fibers, and structure and properties of polymer solids. In the recent progress in studies of the static and dynamic structure of bulk polymers he played a pioneering role by introducing the newest techniques such as a solid-state high-resolution NMR method and various neutron scattering methods. At the Graduate school of Engineering, Kyoto University, he gave lectures on polymer structure, polymer crystals, fiber chemistry, and NMR, and supervised dissertation works of graduate students.

The sincere and warm personality of Dr. Kitamaru has won him the respect of his friends, colleagues, and students. This collection of papers is dedicated to him to honour his long period of service on his retirement.

CONTENTS

Commemoration Issue Dedicated to
 Professor Hiroshi Inagaki
 Professor Michio Kurata
 Professor Ryoza Kitamaru
 on the Occasion of Their Retirements

Osamu Hasegawa, Shin-ichi Takahashi, Hidematsu Suzuki and Takeaki Miyamoto: Grafting of Polypeptide on Cellulose Derivatives	93
Seiki Nishihara, Takeshi Fukuda and Hiroshi Inagaki: Grafting of Living Polystyrene onto Poly(methyl methacrylate) and Its Copolymer	103
Koichi Hatada, Tatsuki Kitayama, Yoshio Terawaki, Koji Ohta, Yoshio Okamoto, Heimei Yuki and R. W. Lenz: NMR Spin-Lattice Relaxation Times of Poly(α -substituted acrylate)s in Solution.....	115
Yuichiro Shuto, Masahiko Murayama, Jun-ichi Azuma and Keizo Okamura: NMR Assignments of Propionyl Groups in Cellulose Tripropionate.....	128
Akira Miyake: A Mean Field Approximation of the Excluded Volume Effect in Polymer Solutions	136
Yoshiyuki Einaga: A Thermodynamic Approach to Phase Equilibrium in Ternary Polymer Solutions.....	140
Masaaki Uchida and Masahide Yamamoto: Local Motion of Polystyrene Chain Studied by the Fluorescence Depolarization Method	154
Kanji Kajiwara, Hiroshi Urakawa, Nobuo Donkai, Yuzuru Hiragi, Hiroshi Inagaki and Manfred Schmidt: Lyotropic Mesophase Formation of Imogolite	165
Akihumi Kobayashi, Masami Kawaguchi, Tadayo Kato and Akira Takahashi: Intercalation Adsorption of Poly(ethylene oxide) into Montmorillonite	176
Yoshisuke Tsunashima, Masukazu Hirata and Michio Kurata: Properties of Particle Scattering Functions for Two Types of Spherical Micelles Composed of Hard Core and Shell of Symmetrically Arranged Rods or Shell of Gaussian Subchains.....	184
Tadashi Inoue, Norio Nemoto and Michio Kurata: Self Diffusion of Block Copolymers in Solution.....	195
Kunihiro Osaki, Eiichi Takatori, Michio Kurata, Hiroshi Watanabe, Hirotsugu Yoshida and Tadao Kotaka: Viscoelasticity of a Solution of Star-Branched Polystyrene.....	205
Yasushi Takada, Takahiro Sato, Yoshiyuki Einaga and Akio Teramoto: Viscosity of Moderately Concentrated Isotropic Solutions of Xanthan, a Rigid Polyelectrolyte	212

Masatoshi Hazama, Hisatoshi Shimokawa, Nobuo Shimamoto, Kazuya Oguro, Naoko Mochizuki and Hiroyasu Utiyama: Separation of Total Nuclear Proteins by an Improved Two-Dimensional Polyacrylamide Gel Electrophoresis—The Method and Applications—	221
Yin-Chao Tseng, Suong-Hyu Hyon, Yoshito Ikada, Waro Taki, Akira Uno and Yasuhiro Yonekawa: Radiopaque Materials for Embolization	232
Ryoichi Wada, Yasuhiko Tabata, Suong-Hyu Hyon and Yoshito Ikada: Preparation of Poly(lactic acid) Microspheres Containing Anti-cancer Drugs	241
Toshio Hayashi, Eiji Nakanishi and Akio Nakajima: Preparation and Properties of Hydrophilic Polypeptide Membranes as Biodegradable Materials	251
Akio Uemura, Seiichi Isoda, Akiyoshi Kawaguchi, Akio Ishizawa and Ken-ichi Katayama: Structural Changes of Poly(<i>p</i> -phenylene sulphide) on Doping	263
Takumi Okihara, Akiyoshi Kawaguchi, Hideo Tsuji, Soung-Hyu Hyon, Yoshito Ikada and Ken-ichi Katayama: Lattice Disorders in the Stereocomplex of Poly(<i>L</i> -lactide) and Poly(<i>D</i> -lactide)	271
Hiroshi Ohnuma, Tetsuji Shimohira, Hideaki Tanisugi, Itaru Kudose and Tadao Kotaka: Chemical Modification of Poly(styrene- <i>b</i> -butadiene- <i>b</i> -4-vinyl pyridine) Three-Block Polymers of ABC Type	283
Hidematsu Suzuki and Takeaki Miyamoto: A Comparative Study on Barton's and Johnston's Equations for Copolymer Glass Transition Temperature	297
Riichiro Chujo, Toshio Nishi, Hiroyuki Naitoh and Tatsuya Adachi: Depth Profiling of Magnetic Tape with the Aid of SIMS	312
Fumitaka Horii, Yi-yi Chen, Masaru Nakagawa, Barbara Gabrys and Ryoza Kitamaru: ¹³ C NMR Analysis of the α -Methyl Group Rotation of Solid Poly(methyl methacrylate)s with Different Tacticities	317
Taisuke Ito, Katsuhira Aizawa, Jiro Seta and Hiroshi Urakawa: Pressure Effects on Diffusion of Linear Aliphatic Esters Through Polyethylene	330
Tadashi Uyeda, Hisashi Odani and Michio Kurata: Permeation of Gases and a Gas Mixture Through a Polymer Membrane in the Glass Transition Region	344
REVIEW	
Keisuke Kaji, Toshiji Kanaya, Hiroshi Urakawa, Koji Nishida, Ryoza Kitamaru, Julia Higgins and Barbara Gabrys: Structure of Polyelectrolyte Solutions	352
